**MEGAN PRICE**

## **CURRICULUM VITAE**

---

Megan is a Psychology graduate from the University of Chester who has more than a year and half experience working within social care. Through Megan's degree, she was able to gain a depth of knowledge surrounding psychology, to which she has been able to apply to her work within social care.

Within Megan's work within social care, she has worked as a support worker and a brain injury rehabilitation assistant. Throughout her roles she has worked with both adults and children that have all experienced complex care in some capacity; ranging from traumatic brain injuries, spinal injuries, mental health issues and various conditions that affect people daily.

As part of Megan's previous roles, she has engaged and led community centred interventions, and ensured that the client's families were a part of the person-centred approach. This job role allowed her to gain experience of working within a multi-disciplinary team, providing reports in a timely manner and being able to build rapport with her clients.

Megan currently works as an Assistant Psychologist and pulls her knowledge from her degree and past roles to allow her to work successfully in this career.
